

IN THE SPECIFICATION

Please amend the paragraph within the specification beginning on page 11, line 1 with the following:

ABSTRACT

A device ~~(100)~~ for browsing an image collection shows a continuously scrolling sequence ~~(102)~~ of representations ~~(200, 202, 204, 206, 208)~~ of images and commands in a browsing area ~~(103)~~. A user can select ~~(105)~~ a representation, which results in the full image being shown in a display area ~~(106)~~, or in the command being executed. Speed and direction of the scrolling ~~(107)~~ can be varied with an input stroke in the browsing area ~~(103)~~. The representations ~~(200, 202, 204, 206, 208)~~ could be shown together with border areas ~~(201, 203, 205, 207, 209)~~, which when selected limit the sequence ~~(102)~~ to the representations ~~(200, 202, 204, 206, 208)~~ belonging to the same category as the representation whose border area was selected. A general purpose computer can be programmed to function as the device ~~(100)~~ by means of a computer program product.
